

WATER / WASTEWATER FEES

The following fees will be assessed for new water/wastewater services within the City of Lake Worth. Fees must be paid in full prior to any work being started. Commercial projects must make their own water/wastewater taps for the project. The city does not charge tap fees on commercial projects, but rather an inspection fee. The city must inspect all taps made before the water meters will be set. These fees reflect the maximum amount you will be charged, and could possibly be lower depending on the final plat date of the property. Fees will be calculated at the time of permit issuance.
